Mobility Network Engineer

Brno, Czech Republic

We are a multicultural diverse team of network engineers who are currently looking for new colleagues & friends.

We would like to meet motivated candidates who want to become network professionals and further develop their mobility and IP networking skills.

- Are you a fresh graduate seeking experience or skilled veteran who demands new challenges?
- Are you a flexible team player?
- Are you willing to go an extra mile above your normal duties to resolve a problem?
- Are you able to learn quickly, follow procedures and come up with innovative ideas?
- Are you ready to work for the World's TOP #14 most valuable brand and get involved into building a network for over 180 million customers?

YES? Then keep reading!

What would you do

- Performing various network configuration changes in the Mobile Network
- Working with cutting edge technologies including 5G NR
- Remote provisioning of new Cell Sites and Carriers to enhance the network capabilities
- Decommissioning of old networks (3G)

How would you do it

- Completing our extensive training for newcomers and shadowing senior colleagues to the point of fully trained and independent network engineer
- Executing network changes while following our internal processes and technical documentation
- Performing pre-checks and post-checks to ensure network reliability
- Suggesting improvements to the processes
- Reporting errors in the procedures
- Cooperating with your Brno and US based colleagues
- Progressing your knowledge and skills via internal trainings to support new technologies and projects

When would you do it

- Disruptive network changes are performed in maintenance window, which is a 6-hour interval starting morning from 6:00, 7:00 and 9:00 Brno time, depending on the US time zone you remotely work in
- There are some projects that require you to work during US Day hours (starting 14:00 Brno time) and some may also require a night shift work
- This is a full-time job – 40 hours per week

What should you know

- IP experience – CCNA level knowledge
- Mobile networks – understanding of architecture and basic functionality
- Linux/UNIX – practical experience preferred
- Working in a team
  - Ability to quickly learn from the senior team members
  - Share and discuss ideas with the team
  - Ability to work independently when needed
  - Train new team members once you are fully trained and experienced
- Optionally scripting and programming skills
  - Ability to read and understand scripts and code – useful when working with internal tools
  - Designing automation – based on your experience and skills

What will you get

- 5 weeks of vacation
- Pension contributions calculated from percentage of annual income (after 1 year)
- Electronic meal vouchers (in value of 135 CZK)
- ActivePass card contribution
- Compensation for income loss due to sickness; advanced medical program
- Company risk life insurance
- Teambuilding events and a lot of other discounts and benefits
